Contents of Volume 68

Finite-element analysis and design of thin sheet superplastic forming 1
H.L. Xing, Z.R. Wang

Positron trapping at defects in Y–Ba–Cu–O, La–Nd–Ba–Cu–O and La–Nd–Pb–Cu–O superconductors 8
N. Nancheva, N. Feschiev, D. Tzaneva, M. Misheva, N. Djurelov

Loading of forming presses by the upsetting of oblique specimens 13
K. Chodnikiewicz, S.B. Petersen, R. Balendra, P.A.F. Martins

Closed die axisymmetric forging of sintered aluminium preforms 19
G. Sutradhar, A.A. Bashashwan, A.K. Jha, S. Kumar

Ductile fracture in the central region of a circular plate in rotary forging. 23
H.-K. Oh, S. Choi

On the effect of electrodischarge machining parameters on the fatigue life of AISI D6 tool steel 27
O.A. Abu Zeid

A simple algorithm for stamping circular plates by hemispherical punches 33
M. Kadkhodayan, L.C. Zhang

Extraction of the general cross-sectional shape of machine parts 39
J.-D. Kim, D.-S. Kim

On crack susceptibility in the submerged arc welding of medium-carbon steel plates 43
M.E. Khallaf, M.A. Ibrahim, N.A. El-Mahallawy, M.A. Taha

Tool life model for end milling steel (190 BHN) 50
M. Alauddin, M.A. El Baradie

A study on the cutting characteristics of glass fiber reinforced plastics with respect to tool materials and geometries . . 60
S.-O. An, E.-S. Lee, S.-L. Noh

Fatigue behaviour of laser welds of high-strength low-alloy steels 68
J. Oñoro, C. Ranninger

Finite-element modelling of the stretch forming of coated steels 71
A.G. Mamalis, D.E. Manolakos, A.K. Baldoukas

Development of software for the design of a pinion cutter 76
J.-D. Kim, D.-S. Kim

Spark erosion with ultrasonic frequency 83
J.H. Zhang, T.C. Lee, W.S. Lau, X. Ai

Micro surface phenomenon of ductile cutting in the ultrasonic vibration cutting of optical plastics 89
J.-D. Kim, I.-H. Choi

2D finite element parametric studies of the flat-rolling process 99
E.N. Dvorkin, M.B. Goldschmit, M.A. Cavaliere, P.M. Amenta, O. Marini, W. Stroppiana

Special issue devoted to Processing of Advanced Materials. Guest Editor: J.A. McGeough

Crystallization of amorphous iron–nickel–phosphorus alloys prepared by electrodeposition 109
K. Sridharan, K. Sheppard

Influence of laser surface treatment on the oxidation behaviour of an Al–Li–Cu alloy. 117
N. Hari Prasad, R. Balasubramaniam

The dependence of interspace discharge transitivity upon the gap debris in precision electrodischarge machining 121
Y.F. Luo

Metal–ceramic composites via in-situ methods 132
B.S.S. Daniel, V.S.R. Murthy, G.S. Murty

A study of the factors controlling the tube-sinking process for polymer materials 156
W.P. Fisher, A.J. Day

Percolation concept and the electrical conductivity of carbon black–polymer composites:
2: Non-crystallisable chloroprene rubber mixed with HAF carbon black 163
A. Abo-Hashem, M.H. Ali

Percolation concept and the electrical conductivity of carbon black–polymer composites:
3: Crystallisable chloroprene rubber mixed with FEF carbon black 168
M.H. Ali, A. Abo-Hashem

A theoretical model of electrodischarge texturing 172
J.A. McGeough, H. Rasmussen

Plasma treatments of polymeric materials and Al alloy for adhesive bonding. 179
I. De Iorio, C. Leone, L. Nele, V. Tagliaferri

Evaluation of the strength of diffusion bonded joints in continuous fiber reinforced metal matrix composites. 184
S. Fukumoto, A. Hirose, K.F. Kobayashi

Special Issue on Superplasticity and Superplastic Technology in Japan. Guest Editor: Hiroaki Ohsawa

Something ambiguous with superplasticity: a foreword to the Special Issue on Superplasticity and Superplastic Technology in Japan 193
H. Ohsawa

A new process for small boat production based on aluminum hot-blow forming (ABF) 196
H. Nakamura, H. Kayanuma, S. Kimura, M. Kosugi

Evaluation of strain-rate sensitivity in superplastic compressive deformation 206
M. Yoshizawa, H. Ohsawa

A finite-element model for the superplastic bulging deformation of Ti-alloy pipe 215
N. Akkus, K. Manabe, M. Kawahara, H. Nishimura

High-temperature deformation behavior of aluminum alloys produced from centrifugally-atomized powders. 221
T. Satoh, K. Okimoto, S. Nishida

Variation in some mechanical properties of Y-TZP caused by superplastic compressive deformation 229
Y. Motohashi, T. Sekigami, N. Sugeno

Formability of superplastic aluminum alloy processed by mechanical alloying 236
T. Ishikawa, N. Yukawa, K. Suzuki, Y. Suzuki, T. Jimma

Commercial applications of superplastic forming 241
K. Osada

Regular Papers

Color-pattern image processing for the evaluation of stream-lines in plane-strain extrusion. 246
J.P. Wang, Y.T. Lin, Y.S. Tsai

Automated general tolerances for dimensions and features without tolerance indications 251
S.M. Darwish

Advances in the precision machining of small deep holes 257
Z.M. Wang, E.O. Ezugwu, D. Su

Titanium alloys and their machinability—a review 262
E.O. Ezugwu, Z.M. Wang

Investigation on the microstructure of spray coating 275
C.F. Yeung, D. Mei

The behaviour of laminated composite plates as armour. 279
B. Wang, S.M. Chou

Recrystallization of gold alloys for producing fine bonding wires. 288
G. Qi, S. Zhang
